Jiayi Xie (Gary)

LLM Post-training | Agentic RL | LLM Agents

Hangzhou, China | +86 137 3555 8806 | 13735558806@163.com | gary45v.github.io

PROFILE

M.S. student at Zhejiang University and agent post-training research intern at Xiaohongshu (RedNote). Previously interned at TikTok and Meituan; student first author of a CVPR 2026 paper. Focused on agentic reasoning, multimodal systems, reward design, and reliable evaluation.

EDUCATION

Zhejiang University | M.S. in Software Engineering | Hangzhou, China **Sep 2026 - Jul 2029**

- Admitted through recommendation; ranked 1st in the major track.

Zhejiang University of Technology | B.Eng. in Software Engineering | Hangzhou, China **Sep 2022 - Jul 2026**

- Exchange experience at RWTH Aachen University; IELTS 7.0.

EXPERIENCE

Xiaohongshu (RedNote) | Agent Post-training Research Intern **Nov 2026 - Present**

- Conducting research on agent post-training.

TikTok | LLM Post-training Intern **May 2026 - Sep 2026**

- Worked on LLM post-training for live moderation, focusing on multimodal understanding, agentic reasoning, RFT, and Agentic RL.

Meituan | LLM Post-training Intern **Nov 2025 - Apr 2026**

- Developed food-ordering LLM agents with context-aware prompt engineering, preserving user preferences and cart state across multi-turn interactions.
- Built SFT and GRPO-style post-training pipelines with curriculum learning and hybrid reward design using outcome-based and LLM-as-a-Judge signals.

Tianjin University NLP Lab | LLM Intern **Jul 2025 - Aug 2025**

- Built a Deep-Research system for automated literature review under the supervision of Prof. Deyi Xiong.
- Implemented paper crawling, incremental vector indexing, and long-form review generation to improve information freshness and factual grounding.

University of Chinese Academy of Sciences | AIGC Intern **Mar 2025 - Jun 2025**

- Developed speech-driven 3D facial animation and trained a new Mamba-based audio encoder under the supervision of Prof. Changliang Xu.
- Replaced attention-heavy sequence modeling with state-space modules to improve memory efficiency and long-context audio processing.

SELECTED PUBLICATIONS

- Anomaly-Related Residual Fields for Cross-domain Anomaly Detection - CVPR 2026, accepted; student first author. Proposed a residual-evolution field framework that separates persistent anomaly drift from stochastic reconstruction residuals for robust cross-domain detection.
- SAT: From Diverse Anomalies to Structured Representations for Cross-Domain Detection - NeurIPS 2026, under review.
- MAPGA: Manifold-Connected Representation Learning for Graph Anomaly Detection - ICML 2026 submission; student second author.
- DAGR: Domain-Aware Gradient Reuse for Cross-Domain Anomaly Detection - ICML 2026 submission; student second author.

AWARDS & HONORS

- National First Prize, National College Students E-commerce Innovation, Creativity and Entrepreneurship Challenge.
- National Second Prize, China International College Students' Innovation Competition.
- Member, 23rd Cohort, Zhejiang University Qiushi Eagle Program.

TECHNICAL SKILLS

LLM Post-training: SFT, RFT, GRPO, RLAIF, reward design, LLM-as-a-Judge, verifier-based evaluation.

Agent Systems: Agentic reasoning, context engineering, harness engineering, tool-use and evaluation pipelines.

Programming & Research: Python, PyTorch, Git; LLM agents, anomaly detection, diffusion models, Mamba/SSM.
